

UK ACTIVITIES

# Battery Optimisation

# We work for a viable energy future

As a tech-driven energy trading company, Danske Commodities connects producers and large-scale consumers to wholesale markets. We bring renewables to the market at scale, paving the way for a more sustainable future. And through our portfolio of gas storages and assets, we provide the flexibility needed to meet the energy demands and intermittency of renewable power generation. This is our place in the energy transition.

We are a collective of thinkers and doers, working together to make an impact. Like no other.

TRADING

# A strong partner for asset optimisation

As a leading energy trader with a strong reputation and expertise in intraday trading DC strives to be the best-in-class flexibility optimiser. Our ability to value price volatility in intraday markets and our use of advanced technology allow us to optimise battery usage and maximize returns.

From managing charging and discharging, to ensuring longevity and utilising market fluctuations, we have the expertise and tools to help you make informed decisions and unlock the full potential of your battery.

## Benefits

Top #3 on EPEX in terms of trading volume across Europe

85% algorithmic trade execution in intraday

Moody's Baa1 Credit rating and backed by energy major Equinor

Optimisation of >7GW wind and solar [1.5 GW in UK]

Global presence and unmatched market access

First mover in intraday trading and renewable asset balancing

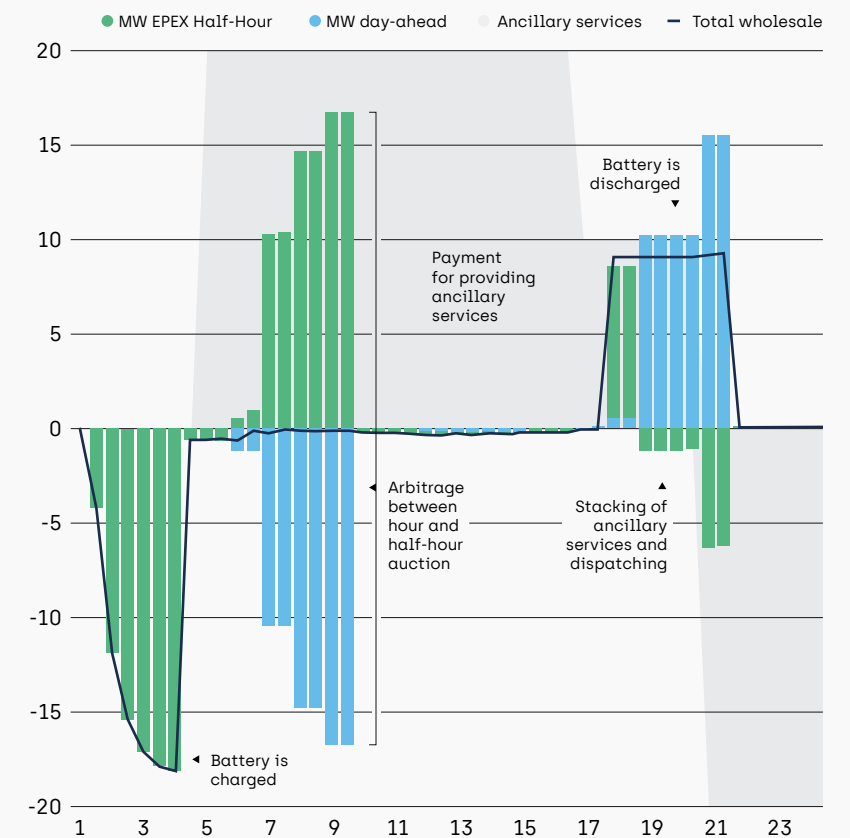

WHAT WE OFFER

# Unlock the potential of your batteries

With an increasing number of batteries entering the market and the risk of ancillary services saturation, it becomes more important than ever to choose the right value pockets for every day, every EFA block, and every single half-hour. With over two decades of experience in development valuing the optionality of price volatility in intraday markets, we are well equipped to help you maximise your returns.

## Example schedule

Example of 24 hours optimised schedule (MW/half-hour)

TECHNOLOGY

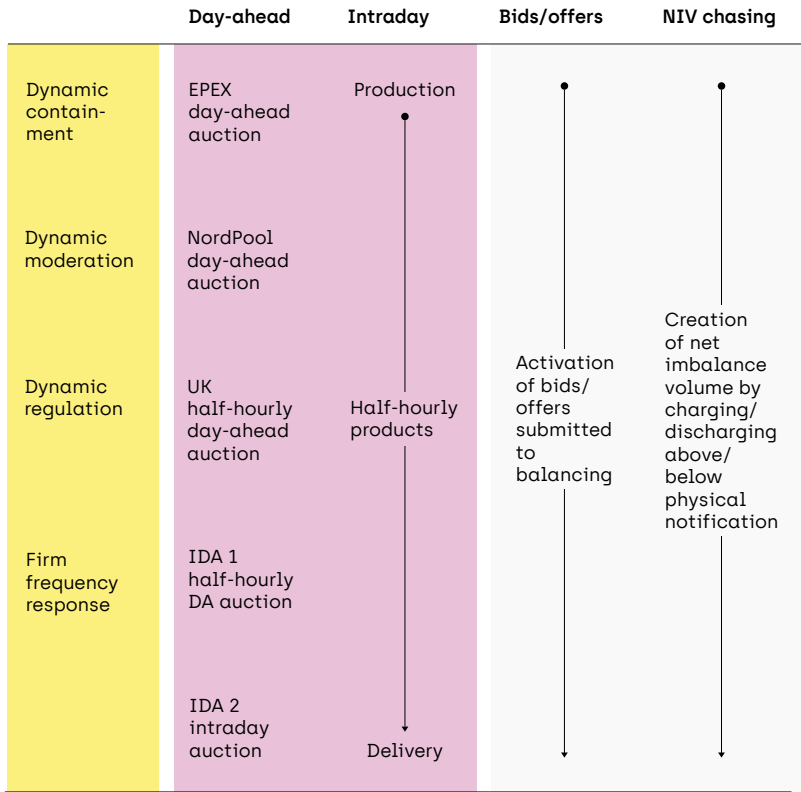

# Fusing trading and tech

We blend the best of both worlds - trading expertise and cutting-edge technology - to create tech-savvy trader hybrids who work closely with quants and software developers. This seamless collaboration leads to faster and error-free trade execution, with a whopping 85% of our trades executed through algorithmic methods in the intraday market.

Our automated trading solutions, backed by advanced analytics and well-established trading strategies, are driving our success and helping us stay ahead of the game.

# Battery-accessible markets

OUR EDGE

# Unmatched market access

With a global presence spanning over 40 countries and valuable partnerships with top energy producers, we are able to stay at the forefront of market trends and insights. Our cutting-edge algorithms and data-driven approach provide the foundation for informed decision-making and effective risk management strategies.

Our unmatched market access is a key ingredient in our success and growth, and is what sets us apart in the industry. We are dedicated to delivering the best prices and solutions to our clients.
